

When should sick children stay home from childcare or primary school?

1. Has your child developed a fever, cough, a sore throat or a stuffy nose in the past 24 hours?

The child must stay home from childcare or school.

If the child's condition worsens and/or you are concerned, contact your doctor or out-of-hours medical service

2. Is your child still sick after 48 hours?

YES

Call your doctor or out-of-hours medical service if your child is not better. The doctor will decide if your child should be tested for COVID-19.

NO

The child can go to childcare or school when they seem well and do not have a fever. The child can go to childcare or school even if they still have mild symptoms like mucus/snot, are a little hoarse or have a small cough. The child does not have to be tested for COVID-19.

3. Should your child be tested for COVID-19?

YES

Your child must stay home until you have received the test results.

NO

The child can go to childcare or school when they seem well and do not have a fever. The child can go to childcare or school even if they still have mild symptoms like mucus/snot, are a little hoarse or have a small cough.

4. Does your child have COVID-19?

YES

Your child must stay home. The municipality will tell you which rules you and your family must follow while the child is sick.

NO

The child can go to childcare or school when they seem well and do not have a fever. The child can go to childcare or school even if they still have mild symptoms like mucus/snot, are a little hoarse or have a small cough.

Contact your doctor or out-of-hours medical service if the child has a cold and:

- The child does not want to play or be active.
- The child has fever, muscle aches, loss of appetite, lethargy, nausea or dizziness.
- Difficulty breathing and/or breathing faster than normal while resting
- Remember that young children cannot explain how they feel, they may be whiny, clingy or irritable.
