**Innledning**

Definisjonsrapportene dokumenterer definisjon av MFRs variabler i samlet database. De viser hvordan variablen defineres, når definisjonen sist ble endret og sammenligninger med tidligere publiserte tall, dvs. 30-årsrapporten fram til og med 1996 og årmeldinger for de resterende årene.

Under følger en forklaring av de viktigste delene i definisjonsrapportene.

**Variabeldefinisjon**

Under overskriften *definisjonsrader* vises en strukturert oppstilling av variabelens definisjon. Variabeldefinisjonene varierer i innhold, noen er satt sammen av koder, kodeverk og kodegrupper (for eksempel misdannelser), noen er hentet direkte fra meldte enkelttopplysninger (for eksempel antall tidligere levendefødte), og noen har så sammensatte definisjoner at de er skjult i funksjoner. Definisjonene er forsøkt gjort lettlæselige, men siden systemet er bygget rundt en Oracle database er det ikke til å unngå at enkelte definisjoner bærer preg av dette.

**Merknader**

Under denne overskriften ligger viktig informasjon om variabelen. Dette kan være beskrivelse av endringer av kategorier eller definisjonendringer over tid.

**Opptellinger**

Hvis det tidligere er publisert tall for variabelen i MFRs 30-årsrapport for perioden 1967-1996 eller i årmeldinger for etterfølgende år, vises en sammenligning mellom tidligere publiserte tall og dagens datainnhold (basert på dagens definisjon).
Definisjonsrapport for variabel: KONJUNKTIVITT

## Variabeldefinisjon

### Definisjonsrader:

<table>
<thead>
<tr>
<th>Kildeuavhengig</th>
<th>Kodeverk</th>
<th>Verdi</th>
</tr>
</thead>
<tbody>
<tr>
<td>Kildeuavhengig</td>
<td>mfrdb_meta.pa_kodestreng.kodestreng(refid, kilde,'LEGEMIDLER_UNDER')</td>
<td></td>
</tr>
</tbody>
</table>

Avhengig av in-parameter KODESTRENG vil koder knyttet til føde/abortmelding og eventuelt tilkoblet barnemelding bli listet ut i kodestrengen. Avhengig av hvor koden er registrert, vil hver kode prefikses med en av skjematype-bokstavene:  
F - fødemelding  
B - barneavdelingsmelding  
A - abortmelding

### Merknader

Regelinformasjon: Inneholder alle koder i kodegruppe lu  
Kategori-info: Datainformasjon: Streng av koder separert med semikolon. Hver kode har formatet Meldingtype_Kode_Kodegruppe_Kodeverknr

Merknader
Regelinformasjon: MFR bruker ICD-10 koden O13 om 'Lettpreeklampsip' og O16 om 'Svangerskapshypertensjon/forbigående hypertensjon (uten proteinuri)'.
Datainformasjon: Alle tilfeller for kilde 1 (1967-98) er plassert i kategori 3 (uspesifisert) pga. for store avvikk mellom kodesystemene
Definisjonsrapport for variabel: PREEKL

</tbody>
</table>

**FUNKSJON**
mrdb_meta.pa_kodestreng.kodestreng(refid, kilde,'PRENAT_PAT_KODER')

Avhengig av in-parameter KODESTRENG vil koder knyttet til føde/abortmelding og eventuelt tilkoblet barnemelding bli listet ut i kodestrengen. Avhengig av hvor koden er registrert, vil hver kode prefikses med en av skjematype-bokstavene:

- F - fødemelding
- B - barneavdelingsmelding
- A - abortmelding

**Merknader**

Reglendring: Inneholder alle koder i kodegruppe pf

Kategori-info: Datainformasjon: Streng av koder separert med semikolon. Hver kode har formatet Meldingtype_Kode_Kodegruppe_Kodeverknr

Merknader
Kodeinformasjon: MERKNAD: For nivå 2 og 3 av tang variabelen (tang ved hodeleie) forekommer det en del fødsler som er registrert med andre leier enn hode i LEIE variabelen. Dette skyldes trolig inkonsistens i melding fra fødeavdeling (MÅ SJEKKES)

Merknader

Kodeinformasjon: Vannavgang 6-24 timer for kilde 1 tolkes som vannavgang 12-24 timer fordi vannavgang 0-12 timer anses som normalt og derfor neppe blir meldt og kodet.
